DETAILED ACTION

1. Applicant's response filed on 07/09/2003 has been fully considered. All previous rejections have been withdrawn in view of Applicant's comments and submission of Declaration under 37 C.F.R. 1:131, therefore, claims 4-8 and 22 are allowed.
2. Claim 22 is added, and claims 1-22 are pending.
3. Since the invention of Group I species B (claims 4-8 and 22) are allowable, the Examiner choose to examine the invention of Group I species A (claims 1-3). Claims 9-21 are withdrawn from consideration as non-elected invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Farooq (US 2003/0153666 A1).

Farooq discloses ink receptor media comprising an ink receptor composition applied on a substrate, wherein the ink receptor composition comprises alumina, hydrophilic binder and hydrophobic latex (abstract). The alumina is boehmite [0020]. The hydrophilic binder can be a combination polyvinyl alcohol and copolymer of vinyl pyrrolidone and vinyl acetate [0023]. The hydrophobic latex is vinyl acetate/ethylene

[0027]. The ink receptor media may comprise ink release coating [0049], wherein the release coating is equivalent to the claimed additional material layer.

Allowable Subject Matter

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Farooq neither teaches nor suggests the claimed content of alumina.
